Foreword

Ontario today is extremely varied with respect to the origin, language and cultural background of its residents. It is the obligation of all parts of the Ontario Government to serve this diverse population.

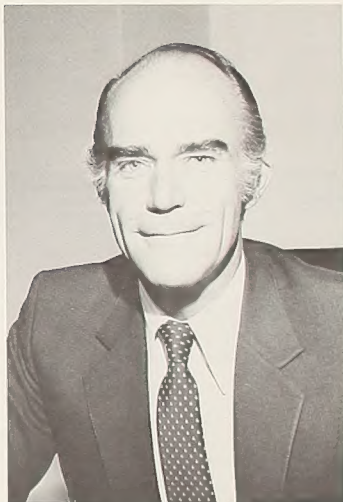

To do this, the government requires information about the patterns of residential settlement and socio-demographic characteristics of ethnocultural groups resident in this Province. The Mother Tongue Atlas of Metropolitan Toronto is the first stage of an undertaking by the Ministry of Citizenship and Culture, as the lead ministry for multiculturalism and citizenship, to provide this type of information in a systematic form.

I am certain that this publication will also be helpful to other levels of government, community organizations and agencies, universities, and the public generally.

Bruce McCaffrey

Minister of Citizenship
and Culture

Preface

The Mother Tongue Atlas of Metropolitan Toronto has been produced for the Ethnocultural Data Base of the Ontario Ministry of Citizenship and Culture as part of its Multicultural Program, in support of the ministry's lead role in multiculturalism and citizenship. The major purpose of the Ethnocultural Data Base is to provide the Ontario Government with information about the patterns of residential settlement and the socio-demographic characteristics of Ontario's ethnocultural groups.

This volume of the Mother Tongue Atlas provides a comparison between 1976 and 1971 census data. Volume II will contain a similar comparison between 1981 and 1971 census data.

The data included in the Atlas were obtained from Statistics Canada and compiled under the supervision of Dorene E. Jacobs, Research Officer, and Maryelle Tetresult, Assistant Research Officer, Multiculturalism and Citizenship Division,

Ministry of Citizenship and Culture. The Atlas itself has been prepared by Janice L. DePoe, Publications Officer, with the assistance of Diane Dias, Christine Heegeman and Eric Smith, Central Statistical Services, Ontario Ministry of Treasury and Economics. Computer assistance was provided by R. N. Dalal, Supervisor, Data Administration. The cover was designed by David Wyman.

Additional copies may be obtained from the Ontario Government Bookstore.

Further information about the Ethnocultural Data Base is available from:

I. Introduction

General

The Mother Tongue Atlas of Metropolitan Toronto provides a detailed profile of the municipalities within Metropolitan Toronto and of the total Metro area. Data are presented showing numerous demographic characteristics of the population according to the Mother Tongue they indicated in the Census of Population and Housing.

The variables studied include age, sex and marital status of the population, family structure, number of children, mobility status, education and labour force activity.

The Mother Tongue groups selected for the analysis are all those which comprised more than .5% of the total population of the Census Metropolitan Area of Toronto in 1976 - namely, English, French, Italian, Portuguese, German, Chinese, Greek, Ukrainian, Yugoslav, Polish, Indo-Pakistani, Spanish and Hungarian. The non-official languages are listed in this descending order of size (based on 1976 CMA figures) in the tables and highlights unless otherwise indicated. The total of the persons specifying one of these groups as mother tongue comprised approximately 95% and 93% of the total population in 1971 and 1976, respectively.

The Atlas presents data pertaining to these groups and also shows comparative data between the Official and Non-Official Mother Tongue Groups.

The "All Other" and "Total Non-Official" (or Total Non-English, Non-French) categories include persons who did not state a mother tongue (3% in 1976).

The publication is divided into three sections:

- 1) A Summary comparing the Cities and Boroughs within Metropolitan Toronto, and maps showing the distribution of population for the selected mother tongue groups;
- 2) Profiles of Toronto, York, East York, Etobicoke, North York, Scarborough and Total Metropolitan Toronto;
- 3) Supplementary Tables.

The Supplementary Tables provide an additional dimension for researchers by showing the distribution of population by mother tongue group for each demographic variable and geographic area.

Source and Explanation of Data

The Atlas is based on the 1971 and 1976 Census of Population and Households, enumerated by Statistics Canada.

The 1976 geographic boundaries were applied to the 1971 data to provide

maximum comparability. (For the education data - Table 7 in Profiles and Table F in the Supplementary Data - this was not possible, i.e. 1971 education data were based on 1971 Census geography). Census Tracts with population 250 or less (four or five in total) were excluded. As a result of these geographic adjustments, total population and number of families may differ from published Census totals. These differences are not statistically significant and, consequently, do not limit the use of these data in conjunction with published Census figures.

Labour Force data are derived from the Census weighted sample estimates whereas all other variables are from complete Census coverage.

All maps were produced by the Geocartographics Group, Statistics Canada, except for "Mother Tongue Neither English Nor French" on page 4, which was produced by the Geographical Simulation Laboratory, University of Toronto.

Rounding

All Census figures, including totals are randomly rounded (either up or down) to a multiple of 5. Due to this procedure, where population for a particular age group was very small (less than 35) the breakdown between males and females could not be calculated with sufficient accuracy. In these cases figures are not shown for "Female Proportion" (Table 2 of Profiles).

Calculated percentage distributions were rounded according to standard procedure and therefore may not add to 100%.

Symbols Used

- too small to be expressed (less than ½%)
- * cannot be accurately calculated
- .. data not available

II. Definitions

Mother Tongue: the language first learned and still understood. Infants who have not yet learned to speak are considered to have as mother tongue the language most often spoken in the home.

Official Mother Tongues: English and French.

Non-Official Mother Tongue: any mother tongue other than English or French.

Municipality: area with corporate status governed by Provincial and Territorial Acts.

Census Subdivision: general term applying to municipalities, Indian Reserves, unorganized territories and subdivisions.

Metropolitan Toronto: a component of the larger Toronto Census Metropolitan Area, in Census terms, a Census Division. It is comprised of the six area municipalities: the Cities of North York and Toronto, and the Boroughs of East York, Etobicoke, Scarborough and York, each of which is a Census Subdivision.

Central Metropolitan Toronto: Toronto City, East York and York.

Suburban Metropolitan Toronto: Etobicoke, North York and Scarborough.

Marital Status - Single: never married.

Mobility Status: is determined by the response to a question relating to the individual's dwelling or place of residence five years earlier. Based on this question, the population is classified into non-movers or movers.

Note: Canadian residents stationed outside in the Armed Forces or the diplomatic service are excluded from the population universe from which mobility data are collected. Those aged 0-4 on Census Day are also excluded from the mobility status universe as the 5-year reference period precludes this segment of the population.

Non-Movers: are persons who, on Census Day, were living in the same dwelling they occupied five years earlier.

Movers: are persons who, on Census Day, were living in a different dwelling than the one occupied five years earlier.

Non-Migrants: are movers who, on Census Day, were living within the same Census Subdivision they resided in five years earlier.

Migrants: are movers who, on Census Day, were residing in a different Census Subdivision than five years earlier.

Labour Force: refers to the non-inmate population, 15 years of age and over who, in the week prior to enumeration were employed or unemployed.

Employed: consists of persons who, in the week prior to enumeration, worked for pay or in their own business, farm or professional practice; helped without pay in a family business or farm; or had a job from which they were temporarily absent because of illness, vacation, labour dispute at their place of work, training course (pro-vided the job was being held until training's return), bad weather, fire, personal reasons, etc.

Unemployed: includes persons not classified as employed, who, in the week prior to enumeration,

(1) looked for work and were available to start work. As well, the Census Instruction booklet asked persons who would have actively looked for work, but did not for certain specific reasons, to answer "yes" to the "looking" question. Those reasons were: temporary illness, indefinite layoff (exceeding 30 days) from a job to which they expected to be called back; or belief that no work was available in their community.

(2) were on temporary lay-off, not exceeding 30 days, from a job to which they expected to return (excluding full-time elementary and secondary school students); or

(3) had definite arrangements to start a new job at a future date (excluding full-time elementary and secondary school students).

Participation Rate: the percentage the total labour force (employed plus unemployed) forms of the population 15 years of age and over in the area or category.

Unemployment Rate: the percentage the unemployed labour force forms of the total labour force in the category or area.

Note in the Labour Force: refers to persons who were inmates of institutions, or who did not work, or look for work, were not on temporary lay-off and did not have a job from which they were absent because of illness, etc., in the week prior to enumeration.

Highlights

Summary

* In 1971, the largest mother tongue group in Metropolitan Toronto was English, numbering 1,474,335 (71% of the population). The French group comprised just under 2%. Those indicating a non-official language mother tongue group made up the remaining 27% of the total population. The eleven largest of these groups were (in order of size): Italian, German, Greek, Portuguese, Ukrainian, Polish, Yugoslav, Chinese, Hungarian, Indo-Pakistani and Spanish.

In 1976, the English group (population 1,477,150) was still the largest (70% of the population). The French group had decreased to 1% of the population. The proportion of persons indicating neither English nor French as mother tongue had increased to over 28%. Also, the ranking order for the eleven groups had changed. Italian was still the largest, followed by Portuguese, German, Greek, Chinese, Ukrainian, Yugoslav, Polish, Spanish, Indo-Pakistani and Hungarian.

* The mother tongue groups with the largest increases in population between 1971 and 1976 were Spanish (+146%) and Indo-Pakistani (+127%); those with the largest decreases were German (-27%) and Polish (-22%).

Comparison of the Six Area Municipalities

* The percentage of the population indicating English or French as mother tongue ranged from 58% (York) to 87% (Scarborough) in 1971. In 1976, these same municipalities had the lowest and highest figures (60% and 83%).

* The largest non-official mother tongue groups, by area municipality, were: for Toronto, Italian and Portuguese in both years; for York, Italian and German in 1971 and Italian and Ukrainian in 1976; for East York, Italian and Greek in both years; for Etobicoke, Italian and German in 1971, and Italian and Ukrainian in 1976; for North York and Scarborough, Italian and German in both years.

* More than 10% of the population of Toronto, York and North York indicated Italian as mother tongue in 1971. For the Borough of York, the actual figure was 25.4%. This was the highest proportion of any one non-official language group for an individual municipality.

By 1976, the Italian group had decreased to 7.7% of Toronto's population, 20.8% of York's and 11.3% of North York's. The York proportion was still the largest for a non-official group within an individual municipality.

* A single non-official mother tongue group comprised over 3% of the area municipality population in seven other instances in 1971. They were in Toronto, Portuguese (4.2%) and Greek (3.7%); East York, Italian (4.7%) and Greek (4.6%); Etobicoke, Italian (5.9%) and Scarborough, Italian (3.1%) and German (3.1%).

By 1976, the Portuguese group had increased to 6.9% of the population of Toronto and the Chinese to 3.1%. The Greek group in Toronto had decreased to 2.6%. The Greek group in East York had increased to 5.0% and the Italian decreased to 3.9%. The Italian group in Etobicoke constituted 6.4% of the population and in Scarborough 3.2%. No other non-official language mother tongue group constituted more than 3% of the population of any one of the six municipalities within Metropolitan Toronto.

Comparison - Central versus Suburban Metro

* Approximately 64% of the population of the Central Area (Toronto, York and East York) was in the Official Mother Tongue group in both years. In Suburban Metro (North York, Etobicoke and Scarborough) this proportion decreased from over 79% in 1971 to approximately 76% in 1976.

* In 1971, the five largest non-official mother tongue groups in the Central Area were, in order of size, Italian (12.6%), Greek (3.5%), Portuguese (3.3%), German (2.2%) and Ukrainian (2.0%). By 1976, this list had changed to Italian (9.3%), Portuguese (5.3%), Greek (2.7%), Chinese (2.5%) and Ukrainian (1.8%).

* The five largest non-official mother tongue groups for Suburban Metro in 1971 were Italian (7.7%), German (2.8%), Ukrainian (1.0%), Polish (0.9%) and Greek (0.9%). By 1976, this list had changed to include Italian (7.6%), German (2.0%), Yugoslav (1.2%), Chinese (1.1%) and Greek (1.0%).

Location of Selected Mother Tongue Groups within the Six Area Municipalities

* In 1971, 34% of the population of Metropolitan Toronto lived within the City of Toronto. The proportions for the other area municipalities were North York (24%), Scarborough (16%), Etobicoke (14%), York (7%) and East York (5%). The distribution had changed by 1976 to Toronto (30%), North York (26%), Scarborough (18%), Etobicoke (14%), York (7%) and East York (5%).

* In 1971, 38% of those with Italian as mother tongue lived in Toronto, 29% in North York and 18% in York. By 1976, the Toronto and York proportions had decreased to 28% and 17%. 36% were in North York.

* The Portuguese mother tongue group was the most highly concentrated in one municipality - 87% and 85% lived in Toronto in 1971 and 1976 respectively. Less than 1% of this group lived in East York in both years, constituting the smallest percentage of any mother tongue group in an area municipality.

* In both years, the German group had large proportions (20% or more) of its population in each of Toronto, North York and Scarborough.

* The Chinese group was concentrated in the City of Toronto (76% in 1971 and 55% in 1976). 10% resided in North York and 5% in Scarborough in 1971. These figures had increased to 20% and 13% respectively by 1976.

* The population with Greek as mother tongue was concentrated in Toronto in 1971 (61%), with significant proportions in East York (11%), North York (10%) and Scarborough (10%). By 1976, a smaller percentage lived in Toronto (44%) and larger proportions in East York (15%), North York (15%) and Scarborough (16%). 52% and 45% of the Ukrainian mother tongue group were located in Toronto in 1971 and 1976 respectively. There were also large proportions in Etobicoke for both years (23% and 28%).

* Of the Yugoslav group, 46% lived in Toronto and over 19% in Etobicoke in 1971. By 1976, the Toronto proportion had decreased to 28% while the Etobicoke percentage increased to over 22%.

* Those with Polish as mother tongue were concentrated in Toronto in 1971 (55%). Significant proportions were also in Etobicoke (18%) and North York (14%). By 1976, the former had decreased to 49% and the latter increased to 22% and 16% respectively.

* In 1971, 45% of those in the Indo-Pakistani mother tongue group resided in Toronto, 22% in North York. By 1976, the Toronto proportion had decreased to 23% and the North York proportion had increased to 34%. In that year, 20% lived in Scarborough, up from 10% in 1971.

* The Spanish group was also situated largely in Toronto and North York (47% and 28% in 1971 and 42% and 32% in 1976).

* The population indicating Hungarian as mother tongue was concentrated in Toronto (41%) and North York (31%) in 1971. This was also the case in 1976 when corresponding figures were 33% and 37%.

Location of Selected Mother Tongue Groups - Central Area versus Suburban Metro

* In 1971, 46% of the population of Metro lived in the Central Area. This had decreased to 41% in 1976.

* Of the population with English as mother tongue, 41% lived in the Central Area in 1971 and 37% in 1976.

* In 1971, 46% of the selected non-official mother tongue groups had more than half the population in the Central Area. They were Italian (58%), Portuguese (91%), Chinese (62%), Greek (78%), Ukrainian (63%), Yugoslav (61%), Polish (63%), Indo-Pakistani (56%), Spanish (60%) and Hungarian (54%). The only selected group with less than half in the Central Area was German (40%).

By 1976, there were only six of these selected groups with more than half their population in the Central Area. They were Portuguese (90%), Chinese (63%), Greek (66%), Ukrainian (56%), Polish (57%) and Spanish (53%). Those with a majority of their population in Suburban Metro were Italian (54%), German (65%), Yugoslav (56%), Indo-Pakistani (66%) and Hungarian (56%).

Highlights

Population

- * The population of the City of Toronto decreased from 712,080 to 633,320 between 1971 and 1976 (-11%). The proportion that reported either official language (English or French) as mother tongue dropped slightly from 63.2% in 1971 to 62.6% in 1976.
- * The mother tongue group with the largest increase in population from 1971 to 1976 was Spanish (+120%), followed by Portuguese (+45%). The largest decreases were in the Italian, German and Greek groups (each -38%).
- * In both years, the non-official mother tongue groups comprised 37% of the total population. The largest of these was Italian with its proportion decreasing from 11% of the total in 1971 to just under 8% in 1976. Eight other non-official mother tongue groups each comprised more than one per cent of the population in 1971; in descending order according to size these were Portuguese (4.2%), Greek (3.6%), Ukrainian (2.3%), Polish (2.3%), Chinese (2.2%), German (2.2%), Yugoslav (1.5%) and Hungarian (1.1%). All other non-official mother tongue groups combined (including not stated) comprised less than 7% of the total population. In 1976, the corresponding list included Portuguese (6.9%), Chinese (3.1%), Greek (2.5%), Ukrainian (2.0%), Polish (1.8%), German (1.5%), Yugoslav (1.2%) and Spanish (1.1%). The remaining non-official mother tongue groups combined comprised less than 10% of the population.

Age

- * In 1971, 69% of the total population was under 45 years old. Seven mother tongue groups had a larger proportion in this age category than did the total population. The groups and corresponding percentages were Italian (81%), Portuguese (86%), Chinese (79%), Greek (87%), Yugoslav (79%), Indo-Pakistani (95%) and Spanish (89%). The other groups had a smaller proportion in this age category - English and French combined (67%), German (63%), Ukrainian (41%), Polish (49%) and Hungarian (55%).
- In 1976, 68% of the total population was under 45 years old, as was 68% of the official languages mother tongue group. Six mother tongue groups had a larger proportion in this age category than the total population. They were Italian (71%), Portuguese (82%), Chinese (76%), Greek (82%), Indo-Pakistani (94%) and Spanish (91%). The five groups with a smaller proportion were German (49%), Ukrainian (34%), Yugoslav (67%), Polish (42%) and Hungarian (41%).
- * Of the total population in 1971, the age group with the largest proportion reporting a non-official mother tongue was the 15 to 44 year olds (38.8% of the age group); the smallest proportion was for the 65 and over group with 25.7%. In 1976 the largest proportion was in the 45 to 64 year old group (40.6% of the age group) and the smallest for the 65 and over group (31.6%).

Sex

- * In both years, the proportion of the male population indicating a non-official mother tongue was larger than that for the female population - 1971, males 38.9%, females 34.7%; 1976, males 39.1% and females 35.9%.
- * In each age group, except 65 and over, the percent of the population that was female ranged from 49% to 51% for both reporting years. The 65 and over group was 61% female in 1971 and 62% in 1976.
- * The percent of the population that was female was higher in the official mother tongue groups than the non-official (1971, 53% and 48% respectively; and 1976, 53% and 49%).
- * In the non-official groups, the percent that was female ranged from 42% (Indo-Pakistani) to 55% (German) in 1976. These figures had increased from 37% and 52% in 1971 when these same groups had the lowest and highest female percentage respectively.
- * In both years, the variation in percent female was most noticeable in the 65 and over category. In 1971, the lowest and highest figures for this age category were for Chinese 39% and Portuguese 65% female. In 1976, they were Ukrainian 46% and Portuguese and German, each 60%.

Marital Status

- * In 1971, 42% of the population of the city was married, compared with 41% in 1976. For people in the combined English and French mother tongue group, 37% were married at the time of the 1971 Census and 35% in 1976. The corresponding figures for those indicating mother tongue other than English or French were 50% (1971) and 51% (1976).
- * In both years, 10% of the female population was widowed and 2% of the male population. For females the proportion varied by mother tongue group - from 2% (Indo-Pakistani) to 14% (Ukrainian and Hungarian) in 1971; in 1976 the range was from 3% (Indo-Pakistani and Spanish) to 20% (Hungarian).
- * In each year, 5% of the total population was either divorced or separated, compared to 3% of those reporting a non-official language mother tongue.
- * In 1971, six of the selected mother tongue groups had 2% or less of their population divorced or separated - namely: Italian, Portuguese, Chinese, Greek, Indo-Pakistani and Spanish. These figures were the same in 1976 except for the Spanish group which had 3% divorced or separated. The remaining groups all had 5% or more in this category with the highest proportion being for those indicating Hungarian as their mother tongue (10% in 1971 and 12% in 1976).

Families

- * In each year, over 43% of family heads indicated a non-official mother tongue.
- * In each year, 87% of all families were husband/wife families. Where the head indicated a non-official mother tongue 91% were husband/wife families in 1971 and 92% in 1976.

* In 1971, the mother tongue groups with the highest proportion of lone parent families led by a female parent were English and French (combined) (14%), German (11%) and Polish (10%). In 1976, the same groups had the largest proportions (15%), 12% and 11% respectively). The lowest proportions were in the Italian, Portuguese and Indo-Pakistani groups (each 4% in 1971). In 1976, they had 5%, 4% and 5% of families respectively in this category. The Greek mother tongue group also had 5% lone parent (female) families in 1976.

- * The percentage of families reporting no children at home was 35% in 1971 and 37% in 1976. In both years there was a marked difference between those indicating official and non-official mother tongues. In 1971, 40% of the English-French combined group had no children at home compared to 28% of those indicating other tongues. The equivalent figures in 1976 were 42% and 29% respectively.
- * In both years, the mother tongue groups with the highest proportion of families with 4 or 5 children at home were Italian (1971 - 13%, 1976 - 12%), Portuguese (1971 - 13%, 1976 - 20%, 1976 - 17%).

Mobility Status

- * In 1971, 42% of the total population was classified as non-movers. The mother tongue group with the highest proportion in this category was Ukrainian (65%) and the group with the lowest was Indo-Pakistani (4%). In 1976, 47% of the total population had not moved since the last Census. The highest percentage of non-movers was for the Ukrainians (75%) followed by the Italians (71%). The Indo-Pakistani group had the largest proportion of movers - 94%. 69% were migrants from outside Canada.
- * In 1971, 33% of the population 15 years of age and older had less than grade 9 education. This group included 22% of those in the English or French mother tongue group and 51% of those indicating other tongues. By 1976, these figures had been reduced to - 28%, 17% and 48% respectively.
- * The percentages of those age 15 and over indicating a non-official mother tongue and having university education rose from 11% in 1971 to 15% in 1976. In 1976, the largest percentages of people with post-secondary education were in the Indo-Pakistani (61%), German (50%) and Hungarian (46%) mother tongue groups. The lowest were the Portuguese (5%), Italian (9%) and Greek (13%) groups.

Labour Force Activity

- * In 1971, 65% of the population 15 years and over was in the labour force. The participation rates ranged from 79% (Indo-Pakistani mother tongue group) to 62% (Ukrainian). In 1976, the participation rate for all groups was 63%. The highest was for the Indo-Pakistani mother tongue group (74%) and the lowest Ukrainian (54%).
- * The unemployment rate for all groups, the English and French combined group, and all other mother tongue groups combined was 9% in 1971 and 7% in 1976. In both years the highest rate was for Indo-Pakistanis (1971 - 13%, 1976 - 11%) and the lowest for Portuguese and German (1971 - 6%, 1976 - 5%).

Highlights

Population

- * The population of the Borough of York decreased from 147,195 to 141,370 between 1971 and 1976 (-4%). The proportion that reported either official language (English or French) as mother tongue increased from 58.1% in 1971 to 60.0% in 1976.
- * The mother tongue group with the largest increase in population from 1971 to 1976 was Portuguese (+137%), followed by Spanish (+118%). The largest decrease was in the German mother tongue group (-36%).
- * The non-official mother tongue groups comprised 42% of the total population in 1971 and 40% in 1976. The largest of these was Italian with its proportion decreasing from 25% of the total in 1971 to just under 21% in 1976. Six other non-official mother tongue groups each comprised more than one per cent of the population in 1971; in descending order according to size these were German (2.2%), Ukrainian (2.0%), Yugoslav (1.9%), Greek (1.6%), Polish (1.3%) and Hungarian (1.2%). All other non-official mother tongue groups combined (including not stated) comprised less than 7% of the total population. In 1976, the corresponding list included Ukrainian (1.8%), Greek (1.8%), Portuguese (1.6%), Yugoslav (1.6%), German (1.5%), Polish (1.1%) and Spanish (1.1%). The remaining non-official mother tongue groups combined comprised less than 10% of the population.

Age

- * In 1971, 71% of the total population was under 45 years old. Seven mother tongue groups had a larger proportion in this age category than did the total population. The groups and corresponding percentages were Italian (82%), Portuguese (84%), Chinese (82%), Greek (86%), Yugoslav (84%), Indo-Pakistani (92%) and Spanish (87%). The other groups had a smaller proportion in this age category - English and French combined (68%), German (66%), Ukrainian (64%), Polish (44%) and Hungarian (60%).

In 1976, 69% of the total population was under 45 years old. Eight mother tongue groups had a larger proportion in this age category than the total population - English and French combined (70%), Italian (73%), Portuguese (83%), Chinese (82%), Greek (84%), Yugoslav (74%), Indo-Pakistani (93%) and Spanish (88%). The four groups with a smaller proportion were German (47%), Ukrainian (37%), Polish (39%) and Hungarian (44%).

- * Of the total population in 1971, the age group with the largest proportion reporting a non-official mother tongue was the 15 to 44 year olds (45.7% of the age group); the smallest proportion was for the 65 and over group with 28.7%. In 1976 the largest proportion was in the 45 to 64 year old group (45.3% of the age group) and the smallest for the 65 and over group (33.4%).

Sex

In both years, the proportion of the male population indicating a non-official mother tongue was larger than that for females - 1971, males 44.1%, females 39.9%; 1976, males 42.1% and females 38.8%.

- * For each age group, except the 65 and over, the percent of the total population that was female ranged from 48% to 52% for both reporting years. The 65 and over group was 61% female in 1971 and 60% in 1976.
- * The percent of the population that was female was higher in the official mother tongue groups than the non-official (1971, 53% and 49% respectively; and 1976, 53% and 49%).
- * In the non-official groups, the percent that was female ranged from 45% (Indo-Pakistani) to 55% (German) in 1976. These figures had increased from 42% and 54% in 1971 when these same groups had the lowest and highest female percentage respectively.

Marital Status

- * In both years, 48% of the population of the Borough was married. For people in the combined English and French mother tongue group 42% were married in 1971 and 41% in 1976. The corresponding figures for those indicating mother tongue other than English or French were 55% (1971) and 59% (1976).
- * In both years, 9% of the female population was widowed and 2% of the male population. For females the proportion varied by mother tongue group - from 3% (Chinese and Spanish) to 12% (Ukrainian and Polish) in 1971; in 1976 the range was from 4% (Greek and Spanish) to 18% (Polish).
- In 1971, 3% of the total population was either divorced or separated, compared to 2% of those reporting neither English nor French mother tongue. In 1976, the corresponding figures were 4% and 2%.
- * In both years, six of the selected mother tongue groups had 2% or less of their population divorced or separated - namely: Italian, Portuguese, Chinese, Greek, Indo-Pakistani and Spanish. The highest proportion in this category was for those indicating Hungarian as their mother tongue (9% in both years).

Family

- * In each year, over 47% of family heads indicated a non-official mother tongue.
- * In 1971, 90% of all families were husband/wife families. The corresponding figure for 1976 was 89%. Where the head indicated a non-official mother tongue 94% were husband/wife families in both years.

* The unemployment rate for all groups, the English and French combined group, and all other mother tongue groups combined was 8% in 1971. In 1976, the figures were 6%, 7% and 6% respectively. In 1971, the highest rate was for the Spanish group (16%) and the lowest Portuguese (5%). In 1976, the highest was Indo-Pakistani (10%), the lowest Pakistani (3%).

* In 1971, the mother tongue groups with the highest proportion of lone parent families led by a female parent were English and French (combined) (122), German and Spanish (92). In 1976 the groups with the largest proportions were English-French (137), Chinese (117) and German (107). The lowest proportions were in the Tamil and Portuguese groups in 1971 (each 3%). In 1976, they had 3% and 4% of lone parent families in this category. The Greek mother tongue group had 2% lone parent (female) families in 1976.

* The percentage of families reporting no children at home was 32% in 1971 and 36% in 1976. In both years, there was a marked difference between those indicating official and non-official mother tongues. In 1971, 38% of the English-French combined group had no children at home compared to 24% of those indicating other tongues. The equivalent figures in 1976 were 41% and 26% respectively.

* In 1971, the mother tongue groups with the highest proportion of families with a son or 5 children at home were Chinese (16%), Italian (8%) and Portuguese (7%). In 1976, the largest were Chinese (16%), Italian (9%), Indo-Pakistani (8%) and Portuguese (5%).

Mobility Status

* In 1971, 47% of the total population was classified as non-movers. The mother tongue group with the highest proportion in this category was Ukrainian (63%) and the group with the lowest was Indo-Pakistani (3%). 90% of those in the Indo-Pakistani group were migrants from outside Canada. In 1976, 47% of the total population had not moved since the last Census. The highest percentage of non-movers was for the Ukrainians (71%). The Indo-Pakistani group had the largest proportion of movers - 95%. 79% were migrants from outside Canada.

Education

* In 1971, 38% of the population 15 years of age and older had less than grade 9 education. This group included 25% of those in the English or French mother tongue group and 58% of those indicating other tongues. By 1976, these figures had been reduced to - 35%, 22% and 56% respectively.

* The percentage of those age 15 and over indicating a non-official mother tongue and having university education rose from 7% in 1971 to 10% in 1976. The largest proportion of people with post-secondary education was in the Indo-Pakistani (55%), Chinese (52%) and German (45%) mother tongue groups. The lowest were the Portuguese (8%), Italian (9%) and Greek (16%) groups.

Labour Force Activity

* In 1971, 67% of the population 15 years and over was in the labour force. The participation rates ranged from 75% (Indo-Pakistani) to 67% (Portuguese). In 1976, the participation rate for all groups was 64%. The highest was for the Spanish and Portuguese mother tongue groups (74% each) and the lowest Ukrainian (56%).

Highlights

Population

- * The population of the Borough of East York increased from 105,010 to 106,950 between 1971 and 1976 (+2%). The proportion that reported either official language (English or French) as mother tongue dropped from 79.5% in 1971 to 75.2% in 1976.
- * The mother tongue group with the largest increase in population from 1971 to 1976 was Chinese (+163%), followed by Indo-Pakistani (+130%). The largest decrease was in the German group (-30%).
- * In 1971, the non-official mother tongue groups comprised 21% of the total population and 25% in 1976. Italian was the largest of these in 1971, with its proportion decreasing from 5% of the total to just under 4% in 1976. Greek at 5% was the largest in 1976. Two other non-official mother tongue groups each comprised more than one per cent of the population in 1971; these were Greek (4.6%) and German (2.1%). All other non-official mother tongue groups combined (including not stated) comprised less than 10% of the total population. In 1976, the corresponding list included Chinese (1.9%), Yugoslav (1.6%) and German (1.4%). The remaining non-official mother tongue groups combined comprised less than 11% of the population.

Age

- * In 1971, 63% of the total population was under 45 years old. Seven mother tongue groups had a larger proportion in this age category than did the total population. The groups and corresponding percentages were Italian (77%), Portuguese (88%), Chinese (87%), Greek (85%), Yugoslav (73%), Indo-Pakistani (92%) and Spanish (86%). The other groups had a smaller proportion in this age category - English and French combined (61%), German (60%), Ukrainian (38%), Polish (46%) and Hungarian (61%).
- In 1976, 63% of the total population was under 45 years old. Seven mother tongue groups had a larger proportion in this age category than the total population - Italian (69%), Portuguese (77%), Chinese (82%), Greek (82%), Yugoslav (66%), Indo-Pakistani (89%) and Spanish (83%). The five groups with a smaller proportion were German (43%), Ukrainian (35%), Polish (45%) and Hungarian (49%).
- * Of the total population in 1971, the age group with the largest proportion reporting a non-official mother tongue was the 15 to 44 year olds (23.7% of the age group); the smallest proportion was for the 65 and over group with 12.6%. Again, in 1976 the largest proportion was in the 15 to 44 year old group (27.7% of the age group) and the smallest for the 65 and over group (16.8%).

Sex

- * In both years, the proportion of the male population indicating a non-official

mother tongue was larger than that for females - 1971, males 21.9%, females 19.3%; 1976, males 26.3% and females 23.6%.

- For each age group, except the 65 and over, the percent of the total population that was female ranged from 49% to 56% for both reporting years. The 65 and over group was 60% female in 1971 and 61% in 1976.
- * The percent of the population that was female was higher in the official mother tongue groups than the non-official (1971, 54% and 50% respectively; and 1976, 54% and 51%).
- * In the non-official groups, the percent that was female ranged from 40% (Indo-Pakistani) to 55% (Ukrainian) in 1971. In 1976, the range was 48% (Italian) to 55% (German and Polish).

Marital Status

- * In 1971, 51% of the population of East York was married, compared with 50% in 1976. For people in the combined English and French mother tongue group 49% were married in 1971 and 48% in 1976. The corresponding figures for those indicating mother tongue other than English or French were 58% (1971) and 59% (1976).
- * In 1971, 11% of the female population was widowed and 2% of the male population. In 1976, the proportions were 12% and 2%. For females the proportion varied by mother tongue group - from 3% (Indo-Pakistani and Spanish) to 16% (Ukrainian) in 1971; in 1976, the range was from 5% (Portuguese, Greek and Indo-Pakistani) to 17% (Ukrainian).
- * In 1971, 4% and in 1976 5% of the total population was either divorced or separated, compared to 3% of those reporting neither English nor French mother tongue.
- * In 1971, five of the selected mother mother tongue groups had 2% or less of their population divorced or separated - namely: Italian, Portuguese, Chinese, Greek and Indo-Pakistani. These figures were the same in 1976 except for the addition of the Spanish group. The remaining groups all had 3% or more in this category with the highest proportion being for those indicating Hungarian as their mother tongue (7% in 1971 and German, Ukrainian, Polish and Hungarian (each 7%) in 1976.

Families

- * In 1971, over 22% of family heads indicated a non-official mother tongue; in 1976, this had increased to 28%.
- * In 1971, 90% of all families were husband/wife families as were 89% in 1976. Where the head indicated a non-official mother tongue 93% were husband/wife families in both years.

* In 1971, the mother tongue groups with the highest proportion of lone parent families led by a female parent were English and French (combined) (10%), Ukrainian (10%), and German (8%). In 1976, the same groups had the largest proportions (11%), 8% and 7% respectively in addition to Polish (8%). The lowest proportions were in the Italian, Chinese, Polish and Indo-Pakistani groups (3% or less in 1971). In 1976, the lowest proportions were in Greek (3%), Italian (4%) and Portuguese (4%).

* The percentage of families reporting no children at home was 44% in 1971 and 45% in 1976. In both years there was a marked difference between those indicating official and non-official mother tongues. In 1971, 47% of the English-French combined group had no children at home compared to 33% of those indicating other tongues. The equivalent figures in 1976 were 48% and 35% respectively.

* In both years, the mother tongue groups with the highest proportion of families with 4 or 5 children at home were Italian (1971 - 10%, 1976 - 8%), Chinese (1971 - 16%, 1976 - 7%) and Spanish (1971 - 9%, 1976 - 5%).

Mobility Status

* In 1971, 48% of the total population was classified as non-movers. The mother tongue group with the highest proportion in this category was Polish (60%) and the group with the lowest was Indo-Pakistani (2%). 85% of those in the Indo-Pakistani group were migrants from outside Canada. In 1976, 46% of the total population had not moved since the last census. The highest percentage of non-movers was for the Ukrainians (66%) followed by the Italians (56%). The Indo-Pakistani group had the largest proportion of movers - 95%. 77% were migrants from outside Canada.

Education

* In 1971, 25% of the population 15 years of age and older had less than grade 9 education. This group included 20% of those in the English or French mother tongue group and 44% of those indicating other tongues. By 1976, these figures had been reduced to - 22%, 17% and 36% respectively.

* The percentage of those age 15 and over indicating a non-official mother tongue and having university education rose from 13% in 1971 to 20% in 1976. In 1976, the largest proportion of people with post-secondary education was in the Indo-Pakistani (61%), Chinese, Spanish and Hungarian (44%), and Italian (10%) groups. The lowest were the Portuguese (19%), Greek (14%) and Italian (10%) groups.

Labour Force Activity

* In 1971, 67% of the population 15 years and over was in the labour force. The participation rates ranged from 78% (Indo-Pakistani mother tongue group) to 65% (Ukrainian). In 1976, the participation rate for all groups was 64%. The highest was for the Indo-Pakistani mother tongue group (78%) and the lowest Ukrainian (55%).

* The unemployment rate for all groups, the English and French combined group, and all other mother tongue groups combined was 6%, 6% and 7% respectively in 1971 and 6% for each in 1976. In 1971, the highest rate was for Spanish (18%) and the lowest for Polish (less than 1%). In 1976, the highest rate was for Indo-Pakistani (14%) and the lowest Ukrainian (1%).

Highlights

Population

- * The population of the Borough of Etobicoke increased from 281,690 to 297,105 between 1971 and 1976 (+5%). The proportion that reported either official language (English or French) as mother tongue dropped from 80.0% in 1971 to 76.6% in 1976.
- * The mother tongue group with the largest increase in population from 1971 to 1976 was Spanish (+390%), followed by Portuguese and Indo-Pakistani (+246% for each). The largest decrease was in the German group (-19%).
- * The non-official mother tongue groups comprised 20.0% of the total population in 1971 and 23.4% in 1976. The largest of these was Italian with its proportion increasing from 5.9% of the total in 1971 to 6.4% in 1976. Four other non-official mother tongue groups each comprised more than one per cent of the population in 1971; in descending order according to size these were German (2.8%), Ukrainian (2.6%), Polish (1.8%) and Yugoslav (1.5%). All other non-official mother tongue groups combined (including not stated) comprised less than 6% of the total population. In 1976, the corresponding list included Ukrainian (2.7%), German (2.2%), Yugoslav (2.0%) and Polish (1.7%). The remaining non-official mother tongue groups combined comprised less than 9% of the population.

Age

- * In 1971, 71% of the total population was under 45 years old, as was the German mother tongue group. Eight mother tongue groups had a larger proportion in this age category than did the total population. The groups and corresponding percentages were English and French combined (72%), Italian (78%), Portuguese (87%), Chinese (81%), Greek (83%), Yugoslav (83%), Indo-Pakistani (94%) and Spanish (92%). The German mother tongue group had 71% under 45 years old. The other groups had a smaller proportion in this age category - Ukrainian (51%), Polish (52%) and Hungarian (66%).

In 1976, 67% of the total population was under 45 years old. Eight mother tongue groups had a larger proportion in this age category than the total population - English and French combined (68%), Italian (71%), Portuguese (79%), Chinese (82%), Greek (81%), Yugoslav (77%), Indo-Pakistani (91%) and Spanish (92%). The four groups with a smaller proportion were German (52%), Ukrainian (41%), Polish (45%) and Hungarian (53%).

- * In 1971, the age group having the largest proportion reporting non-official mother tongue was the 15 to 44 year olds (22.8% of the age group); the smallest proportion was for the under 15 age group with 13.7%. In 1976 the largest proportion was in the 45 to 64 year old group (26.8% of the age group) and the smallest for the under 15 age group (16.5%).

Sex

- * In both years, the proportion of the male population indicating a non-official mother tongue was larger than that for females - 1971, males 20.7%, females 19.7%; 1976, males 24.0% and females 22.9%.
- * Within each age group, except the 65 and over, the percent of the population that was female ranged from 49% to 51% for both reporting years. For the 65 and over group, 59% were female for both years.
- * The percent of the population that was female was higher in the official mother tongue groups than the non-official (1971, 51% and 49% respectively; and 1976, 51% and 50%).
- * In the non-official groups, the percent that was female ranged from 47% (Indo-Pakistani) to 52% (German and Polish) in 1976. These figures had increased from 44% and 51% in 1971 when Indo-Pakistani and German groups had the lowest and highest female percentage respectively.
- * In both years, the variation in percent female was most noticeable in the 65 and over category. In 1971, the lowest and highest figures for this age category were Polish 45% and Portuguese 67% female. In 1976, they were Ukrainian 51% and Portuguese 69%.

Marital Status

- * In 1971, 48% of the population of the Borough was married, compared with 50% in 1976. For people in the combined English and French mother tongue group 45% were married in 1971 and 1976. The corresponding figures for those indicating mother tongue other than English or French were 62% (1971) and 63% (1976).
- * In 1971, 7% of the female population was widowed and in 1976, 8%. This compares with 4% of the male population in 1971 and 5% in 1976. For females the proportion varied by mother tongue group - from 2% (Indo-Pakistani) to 9% (Chinese and Polish) in 1971; in 1976 the range was from 3% (Indo-Pakistani and Spanish) to 12% (Ukrainian).
- * In each year, 3% of the total population was either divorced or separated, compared to 2% of those reporting neither English nor French mother tongue.
- * In 1971, seven of the selected mother tongue groups had 1% or less of their population divorced or separated - namely: Italian, Portuguese, Chinese, Greek, Yugoslav, Indo-Pakistani and Spanish. In 1976, for the Greek and Yugoslav (2% each) and Spanish (3%) groups this percentage had increased to more than one percent. Of the remaining groups in this category the highest proportions (in each case, 6%) were for those indicating Hungarian as their mother tongue in 1971, and Hungarian and German in 1976.

Families

* In 1971, 25% of family heads indicated a non-official mother tongue, by 1976 this had increased to 29%.

* In 1971, 92% of all families were husband/wife families; by 1976 this had decreased to 90%. Where the head indicated a non-official mother tongue 95% were husband/wife families in 1971 and 94% in 1976.

* In 1971, the mother tongue groups with the highest proportion of lone parent families led by a female parent were English and French (combined) (7%) and Chinese (6%). In 1976, the English and French (combined) (10%) and German (7%) had the highest figures. The lowest proportions were in the Hungarian group (2%) in 1971 and the Italian, Portuguese, Yugoslav and Indo-Pakistani groups (3% each) in 1976.

* The percentage of families reporting no children at home was 28% in 1971 and 33% in 1976. In 1971, 29% of the English-French combined group had no children at home compared to 25% of those indicating other tongues. The equivalent figures in 1976 were 35% and 28% respectively.

* In 1971, the mother tongue groups with the highest proportion of families with 4 or 5 children were Portuguese (12%), Italian (10%) and Chinese and Indo-Pakistani (9% each). In 1976 the equivalent high percentages were recorded by the Italian (8%), Indo-Pakistani (7%) and Portuguese (6%) groups.

Mobility Status

* In both years, 54% of the total population was classified as non-movers. The mother tongue group with the highest proportion in this category in 1971 was Ukrainian (58%) and the group with the lowest was Indo-Pakistani (1%). 83% of those in the Indo-Pakistani group were migrants from outside Canada. The highest percentage of non-movers in 1976 was for the Ukrainians (65%) followed by the Germans (59%). The Spanish group had the largest proportion of movers (94%), 66% were migrants first outside Canada.

Education

* In 1971, 21% of the population 15 years of age and older had less than Grade 9 education. This group included 16% of those in the English or French mother tongue group and 42% of those indicating other tongues. By 1976, these figures had been reduced to - 18%, 13% and 37% respectively.

* The percentage of those age 15 and over indicating a non-official mother tongue and having university education rose from 11% in 1971 to 17% in 1976. In 1976, the largest percentage of people with post-secondary education was in the Chinese (61%), Indo-Pakistani (58%) and Hungarian and German (47% each) mother tongue groups. Those having the lowest percentages were the Italian (1%), Portuguese (15%) and Greek (18%).

Labour Force Activity

* In 1971, 66% of the population 15 years and over was in the labour force. The participation rates ranged from 82% (Indo-Pakistani mother tongue group) to 65% (Ukrainian). In 1976, the participation rate for all groups was 66%. The highest was for the Indo-Pakistani mother tongue group (73%) and the lowest Ukrainian (64%).

* The unemployment rate for all groups, the English and French combined group and all other mother tongue groups combined was in each case 6% in 1971 and 5%, 6% and 5% respectively in 1976. In both years the highest rate was for Indo-Pakistani (1971 - 10%, 1976 - 12%) and the lowest for Spanish (5%) in 1971 and Greek (3%) in 1976.

Population by Mother Tongue, Non-Official Languages

1971
1976

Highlights

Population

- * The population of the City of North York increased from 503,795 to 558,400 between 1971 and 1976 (+11%). The proportion that reported either official language (English or French) as mother tongue dropped slightly from 74% in 1971 to 71% in 1976.
- * The mother tongue group with the largest increase in population from 1971 to 1976 was Indo-Pakistani (+241%), followed by Chinese (+237%). The largest decrease was in the German group (-24%).
- * The non-official mother tongue groups comprised 26% of the total population in 1971 and 29% in 1976. The largest of these was Italian with its proportion decreasing slightly from 11.8% of the total in 1971 to 11.3% in 1976. Two other non-official mother tongue groups each comprised more than one per cent of North York's population in 1971; these were German (2.6%) and Hungarian (1.2%). All other non-official mother tongue groups combined (including not stated) comprised less than 11% of the total population. In 1976, the corresponding list included German (1.8%) and Chinese (1.3%). The remaining non-official mother tongue groups combined comprised less than 15% of the population.

Age

- * In 1971, 75% of the total population was under 45 years old. Eight mother tongue groups had a larger proportion in this age category than did the total population. The groups and corresponding percentages were English and French combined (76%), Italian (82%), Portuguese (85%), Chinese (84%), Greek (83%), Yugoslav (80%), Indo-Pakistani (93%) and Spanish (86%). The other groups had a smaller proportion in this age category - German (70%), Ukrainian (48%), Polish (40%) and Hungarian (62%).

In 1976, 72% of the total population was under 45 years old, as was 72% of the Italian mother tongue group. Six mother tongue groups had a larger proportion in this age category than the total population - English and French combined (74%), Portuguese (79%), Chinese (82%), Greek (78%), Indo-Pakistani (89%) and Spanish (88%). The five groups with a smaller proportion were German (51%), Ukrainian (39%), Yugoslav (71%), Polish (30%) and Hungarian (48%).

- * Of the total population in 1971, the age groups with the largest proportion reporting a non-official mother tongue were the 45 to 64 year olds and the 65 and over group (each with 30.3% of the age group); the smallest proportion was for the under 15 group with 18.2%. In 1976 the largest proportion was in the 65 and over group (39.9% of the age group) and the smallest for the under 15 group (20.1%).

Sex

- * In both years, the proportion of the male population indicating a non-official mother tongue was larger than that for females - 1971, males 26.7%, females 25.0%; 1976, males 29.2% and females 27.8%.
- * Within each age group, except the 65 and over, the percent of the population that was female ranged from 49% to 51% for both reporting years. The 65 and over group was 60% female in 1971 and 59% in 1976.
- * The percent of the population that was female was higher in the official mother tongue groups than the non-official (1971, 51% and 49% respectively; and 1976, 51% and 50%).
- * In the non-official groups, the percent that was female ranged from 47% (Indo-Pakistani) to 53% (German) in 1976. These figures had increased from 42% and 51% in 1971 when these same groups had the lowest and highest female percentage respectively.
- * In both years, the variation in percent female was most noticeable in the 65 and over category. In 1971, the lowest and highest figures for this age category were Ukrainian 47% and Greek 59% female. In 1976, they were Polish 46% and Portuguese 75%.

Marital Status

- * In 1971 and 1976, 49% of the population of the City was married. For people in the combined English and French mother tongue group 45% were married in 1971 and 43% in 1976. The corresponding figures for those indicating mother tongue other than English or French were 61% (1971) and 62% (1976).
- * In 1971, 6% of the female population was widowed and 1% of the male population. This compares with 7% (female) and 1% (male) for 1976. For females the proportion varied by mother tongue group - from 4% (Spanish) to 11% (Polish) in 1971; in 1976 the range was from 4% (Spanish) to 14% (Ukrainian).
- * In 1971, 2% of the total population was either divorced or separated; the same percentage as for those reporting neither English nor French mother tongue. In 1976, 3% of the total population was either divorced or separated, compared to 2% of those reporting neither English nor French mother tongue.
- * In 1971, six of the selected mother tongue groups had 2% or less of their population divorced or separated - namely: Italian, Portuguese, Chinese, Greek, Indo-Pakistani and Spanish. These figures were the same in 1976. The remaining groups all had 3% or more in this category with the highest proportion being for those indicating Ukrainian as their mother tongue (6% in 1971 and 7% in 1976).

* In each year, over 33% of family heads indicated a non-official mother tongue.

* In 1971, 92% of all families were husband/wife families, compared to 90% in 1976. 11% of the head indicated a non-official mother tongue 95% were husband/wife families in 1971 and 94% in 1976.

* In 1971, the mother tongue groups with the highest proportion of lone parent families led by a female parent were English and French (combined) - 7%, German, Ukrainian and Hungarian following with 6% each. In 1976, the largest proportions were English and French (combined) - 11%, followed by Portuguese, German, Chinese, Ukrainian and Polish with 7%. The lowest proportions were in the Italian

category. In 1976, they had 32, 77, 7% and 5% of families respectively in this category. The percentage of families reporting no children at home was 28% in 1971 and 30% in 1976. The percentage of those indicating other tongues. The equivalent figures in 1976 were 32% and 26% respectively.

* In both years, the mother tongue groups with the highest proportion of families with 4 or 5 children at home were Italian (1971 - 8%, 1976 - 8%), Portuguese (1971 - 8%, 1976 - 7%) and Chinese (1971 - 13%, 1976 - 9%).

Mobility Status

* In 1971, 45% of the total population was classified as non-movers. The mother tongue group with the highest proportion in this category was Italian (57%) and the group with the lowest was Indo-Pakistani (3%). In 1976, 48% of the total population had not moved since the last Census. The highest percentage of non-movers was for the Polish (64%) followed by the Ukrainian (63%). The Indo-Pakistani group had the largest proportion of movers - 95%. 72% were migrants from outside Canada.

Education

* In 1971, 22% of the population 15 years of age and older had less than grade 9 education. This group included 12% of those in the English or French mother tongue group and 46% of those indicating other tongues. By 1976, these figures had been reduced to - 20%, 11% and 40% respectively.

* The percentage of those age 15 and over indicating a non-official mother tongue and having university education rose from 12% in 1971 to 18% in 1976. In 1976, the largest proportion of people with post-secondary education was in the Chinese

Labour Force Activity

* In 1971, 66% of the population 15 years and over was in the labour force. The participation rates ranged from 76% (Indo-Pakistani mother tongue group) to 66% (English and French). In 1976, the participation rate for all groups was 65%. The highest was for the Indo-Pakistani mother tongue group (74%) and the lowest Ukrainian and Polish (61%).

* The unemployment rate for all groups, the English and French combined group and all other mother tongue groups combined was 6% in 1971. For 1976, the unemployment rates were 6%, 6% and 5% respectively. In both years, the highest rate was for Indo-Pakistani (12%) and the lowest for German (1971 - 5%, 1976 - 4%). For

(64%), Indo-Pakistani (60%), German (51%), and Hungarian (46%) mother tongue groups. The lowest were the Portuguese (18%), Italian (11%) and Greek (21%)

 Source: Census of Population and Households

Highlights

Population

- * The population of the Borough of Scarborough increased from 338,455 to 387,150 between 1971 and 1976 (+14%). The proportion that reported either official language (English or French) as mother tongue dropped from 87% in 1971 to 83% in 1976.
- * The mother tongue group with the largest increase in population from 1971 to 1976 was Indo-Pakistani (+372%), followed by Chinese (+311%). The only decreases were in the German (-17%) and Polish (-14%) groups.
- * The non-official mother tongue groups comprised 13% of the total population in 1971 and 17% in 1976. The largest of these was Italian with its proportion 3% of the total in both years. In 1971, the German group was also 3% of the total, although its proportion decreased to 2.2% in 1976. One other non-official mother tongue group comprised more than one per cent of the population in 1971, namely Greek (1.2%). All other non-official mother tongue groups combined (including not stated) comprised 6% of the total population. In 1976, three non-official mother tongue groups, in addition to Italian and German, comprised more than one per cent of the population - Chinese (1.2%), Greek (1.5%) and Yugoslav (1.2%). The remaining non-official mother tongue groups combined comprised approximately 8% of the population.

Age

- * In 1971, 77% of the total population was under 45 years old. Eight mother tongue groups had a larger proportion in this age category than did the total population. The groups and corresponding percentages were English and French combined (78%), Italian (82%), Portuguese (83%), Chinese (84%), Greek (85%), Yugoslav (83%), Indo-Pakistani (93%) and Spanish (88%). The other groups had a smaller proportion in this age category - German (74%), Ukrainian (50%), Polish (49%) and Hungarian (71%).

In 1976, 74% of the total population was under 45 years old, as was 74% of the official language mother tongue group. Seven mother tongue groups had a larger proportion in this age category than the total population - Italian (75%), Portuguese (78%), Chinese (82%), Greek (82%), Yugoslav (75%), Indo-Pakistani (91%) and Spanish (88%). The four groups with a smaller proportion were German (56%), Ukrainian (37%), Polish (40%) and Hungarian (58%).

- * Of the total population in 1971, the age group with the largest proportion reporting a non-official mother tongue was the 15 to 44 year olds (16.0% of the age group); the smallest proportion was for the under 15 group with 8.3%. In 1976, the largest proportion was in the 65 and over group (19.9% of the age group) and the smallest for the under 15 group (11.8%).

Sex

In both years, the proportion of the male population indicating a non-official mother tongue was larger than that for females - 1971, males 13.8%, females 13.0%; 1976, males 17.7% and females 17.0%.

- * Within each age group, except the 65 and over, the percent of the total population that was female ranged from 49% to 51% for both reporting years. The 65 and over group was 64% female in both reporting years.
- * The percent of the population that was female was higher in the official mother tongue groups than the non-official (1971, 50% and 49% respectively; and 1976, 51% and 50%).

- * In the non-official groups, the percent that was female ranged from 43% (Indo-Pakistani) to 52% (Spanish) in 1971. The corresponding figures in 1976 were 47% (Polish and Hungarian) and 52% (Ukrainian).

Marital Status

- * In 1971, 47% of the population of the Borough was married, compared with 48% in 1976. For people in the combined English and French mother tongue group, 45% were married at the time of both Censuses. The corresponding figure for those indicating mother tongue other than English or French was 62% (both years).
- * In 1971, 6% of the female population was widowed and 1% of the male population. In 1976, the proportions were 7% and 1%. For females the proportion varied by mother tongue group - from 4% (Indo-Pakistani and Spanish) to 10% (Ukrainian and Polish) in 1971; in 1976 the range was from 5% (Indo-Pakistani and Spanish) to 17% (Ukrainian).
- * In each year, 3% of the total population was either divorced or separated, compared to 3% of those reporting neither English nor French mother tongue in 1971 and 2% in 1976.
- * In 1971, six of the selected mother tongue groups had 2% or less of their population divorced or separated - namely: Italian, Portuguese, Chinese, Greek, Yugoslav and Indo-Pakistani. These figures were the same in 1976 except for the addition of the Spanish group which also had 2% in 1976. Of the remaining groups the highest proportions were for those indicating Ukrainian, Polish and Hungarian as their mother tongue (4% of each group) in 1971. In 1976, the highest proportion was for Hungarian (7%).

Families

- * In 1971, 18% of family heads indicated a non-official mother tongue; in 1976, this had increased to 22%.
- * In 1971, 92% of all families were husband/wife families, as were 89% in 1976.

where the head indicated a non-officially declared mother tongue with 1711 husbands with 1617 wives in both years.

participation rate for all groups was 65%. The highest was for the Indo-

Platians with a 75% and 1% lower than in 1976.

The unemployment rates for all groups, the English and French combined group and all other mother tongue groups combined were 7%, 7% and 6% in 1971 and 6% for each in 1976. In both years, the highest rate was for Indo-Pakistani (1971 - 12%, 1976 - 12%). The lowest was for Polish and Spanish in 1971 (4%) and Portuguese and German (3%) in 1976.

* In 1971, the mother tongue groups with the highest proportions of lone parent families led by a female parent were English and French (combined), Ukrainian and Polish (7%). In 1976, the English and French (combined) and Ukrainian groups had the largest proportions (11% and 9% respectively). The lowest proportions were in the Yugoslav (2%) and Italian, Portuguese and Greek (3%) groups in 1971. In 1976, they had 4%, 3% and 4% of families respectively in this category. The Indo-Pakistani mother tongue group also had 4% lone parent (female) families in 1976.

* The percentage of families reporting no children at home was 26% in 1971 and 27% in 1976. In 1971, 26% of the English-French combined group had no children at home compared to 22% of those indicating other tongues. The equivalent figures in 1976 were 27% and 26% respectively.

* In both years, the mother tongue groups with the highest proportion of families with 4 or 5 children at home were Italian (1971 - 10%, 1976 - 8%), Portuguese (1971 - 9%, 1976 - 8%), Chinese (1971 - 16%, 1976 - 9%) and Spanish (1971 - 12%, 1976 - 8%).

Mobility status

* In 1971, 50% of the total population was classified as non-movers. The mother tongue group with the highest proportion in this category was Ukrainian (53%) and the group with the lowest was Indo-Pakistani (22%). 79% of those in the Indo-Pakistani group were migrants from outside Canada. In 1976, 49% of the total population had not moved since the last Census. The highest percentage of non-movers was for the Ukrainians (68%). The Indo-Pakistani group had the largest proportion of movers - 95%. 70% were migrants from outside Canada.

Education

* In 1971, 20% of the population 15 years of age and older had less than grade 9 education. This group included 16% of those in the English or French mother tongue group and 39% of those indicating other tongues. By 1976, these figures had been reduced to - 17%, 13% and 32% respectively.

* The percentage of those age 15 and over indicating a non-official mother tongue and having university education rose from 11% in 1971 to 19% in 1976. In 1976, the largest proportion of people with post-secondary education was in the Indo-Pakistani (63%), Chinese (58%) and Spanish (51%) mother tongue groups. The lowest were the Italian (13%), Portuguese (15%) and Greek (14%) groups.

Labour force activity

* In 1971, 66% of the population 15 years and over was in the labour force. The participation rates ranged from 76% (Portuguese) to 64% (Chinese) in 1976, the

Highlights

Population

- * The population of Metropolitan Toronto increased from 2,089,220 to 2,124,295 between 1971 and 1976 (+1.7%). The proportion that reported either official language (English or French) as mother tongue decreased from 72.3% in 1971 to 71.0% in 1976.
- * The mother tongue group with the largest increase in population from 1971 to 1976 was Spanish (+146%), followed by Indo-Pakistani (+127%). The largest decreases were in the German (-27%) and Polish (-22%) groups.
- * The non-official mother tongue groups comprised 27.6% of the total population in 1971 and 29.0% in 1976. The largest of these was Italian with its proportion decreasing from 10% of the total in 1971 to 8% in 1976. Six other non-official mother tongue groups each comprised more than one per cent of the population in 1971; in descending order according to size these were German (2.5%), Greek (2.1%), Portuguese (1.7%), Ukrainian (1.5%), Polish (1.4%) and Yugoslav (1.1%). All other non-official mother tongue groups combined (including not stated) comprised less than 8% of the total population. In 1976, the corresponding list included Portuguese (2.4%), German (1.8%), Chinese (1.7%), Greek (1.7%), Ukrainian (1.3%), Yugoslav (1.2%) and Polish (1.1%). The remaining non-official mother tongue groups combined comprised less than 10% of the population.

Age

- * In 1971, 72% of the total population was under 45 years old, as were 72% of those in the official languages mother tongue group. Seven mother tongue groups had a larger proportion in this age category than did the total population. The groups and corresponding percentages were Italian (81%), Portuguese (85%), Chinese (81%), Greek (86%), Yugoslav (81%), Indo-Pakistani (94%) and Spanish (88%). The other groups had a smaller proportion in this age category - German (68%), Ukrainian (44%), Polish (47%) and Hungarian (60%).

In 1976, 70% of the total population was under 45 years old. Eight mother tongue groups had a larger proportion in this age category than the total population - English and French combined (71%), Italian (72%), Portuguese (82%), Chinese (79%), Greek (82%), Yugoslav (72%), Indo-Pakistani (91%) and Spanish (89%). The four groups with a smaller proportion were German (52%), Ukrainian (37%), Polish (40%) and Hungarian (47%).

- * Of the total population in 1971, the age group with the largest proportion reporting a non-official mother tongue was the 15 to 44 year olds (30.2% of the age group); the smallest proportion was for the under 15 age group with 23.0%. In 1976, the largest proportion was in the 45 to 64 year old group (32.4% of the age group) and the smallest for the under 15 group (23.7%).

Sex

- * In both years, the proportion of the male population indicating a non-official mother tongue was larger than that for females - 1971, males 26.9%, females 26.4%; 1976, males 30.0% and females 28.1%.
- * In each age group, except 65 and over, the percent of the total population that was female ranged from 49% to 51% for both reporting years. The 65 and over group was 61% female in 1971 and 61% in 1976.
- * The percent of the population that was female was higher in the official mother tongue groups than the non-official (1971, 52% and 49% respectively; and 1976, 52% and 50%).
- * In the non-official groups, the percent that was female ranged from 46% (Indo-Pakistani) to 53% (German) in 1976. These figures had increased from 40% and 51% in 1971 when these same groups had the lowest and highest female percentage respectively.
- * In both years, the variation in percent female was most noticeable in the 65 and over category. In 1971, the lowest and highest figures for this age category were Chinese 40% and Portuguese 66% female. In 1976, they were Ukrainian 49% and Portuguese and Spanish, each 61%.

Marital Status

- * In 1971, 46% of the population of Metro was married, compared with 47% in 1976. For people in the combined English and French mother tongue group 42% were married in 1971 and 42% in 1976. The corresponding figures for those indicating mother tongue other than English or French were 56% (1971) and 58% (1976).
- * In 1971, 8% of the female population was widowed and 2% of the male population. In 1976, these figures were 9% and 2% respectively. For females the proportion varied by mother tongue group - from 3% (Indo-Pakistani) to 12% (Ukrainian and Polish) in 1971; in 1976, the range was from 3% (Spanish) to 16% (Polish).
- * In 1971, 3% of the total population was either divorced or separated, as was 3% of those reporting neither English nor French mother tongue. In 1976, 4% of the total population was in this category compared to 2% of those in the non-official mother tongue groups.
- * In 1971, six of the selected mother tongue groups had 2% or less of their population divorced or separated - namely: Italian, Portuguese, Chinese, Greek, Indo-Pakistani and Spanish. These figures were the same in 1976 except for the Spanish group which had 3% divorced or separated. Of the remaining groups the highest proportion was for those indicating Hungarian as their mother tongue (8% in 1971 and 1976).

- * In each year, over 33% of family heads indicated a non-official mother tongue.
- * In 1971, 90% of all families were husband/wife families, as were 89% in 1976, where the head indicated a non-official mother tongue 93% were husband/wife families in 1971 and 1976.
- * In 1971, the mother tongue groups with the highest proportion of lone parent families led by a female parent were English and French (combined) (9%), Ukrainian and Polish (8%). In 1976, the largest proportions were for English and French (combined) (12%), and German (9%). The lowest proportions were in the Italian, Portuguese and Indo-Pakistani groups (4%, 4% and 3% in 1971). In 1976, they had 3%, 4% and 4% of families respectively in this category. The Greek mother tongue group also had 4% lone parent (female) families in 1976.
- * The percentage of families reporting no children at home was 30% in 1971 and 33% in 1976. In both years there was a marked difference between those indicating only official and non-official mother tongues. In 1971, 33% of the English-French combined group had no children at home compared to 26% of those indicating other tongues. The equivalent figures in 1976 were 35% and 27% respectively.
- * In both years, the mother tongue groups with the highest proportion of families with 4 or 5 children at home were Italian (1971 - 9%, 1976 - 8%), Portuguese (1971 - 12%, 1976 - 12%) and Chinese (1971 - 17%, 1976 - 13%).
- Mobility Status
- * In 1971, 46% of the total population was classified as non-movers. The mother tongue group with the highest proportion in this category was Ukrainian (62%) and the group with the lowest was Indo-Pakistani (3%). 84% of those in the Indo-Pakistani group were migrants from outside Canada. In 1976, 48% of the total population had not moved since the last Census. The highest percentage of non-movers was for the Ukrainians (70%). The Indo-Pakistani group had the largest proportion of movers - 95%. 71% were migrants from outside Canada.
- Education
- * In 1971, 27% of the population 15 years of age and older had less than grade 9 education. This group included 18% of those in the English or French mother tongue group and 48% of those indicating other tongues. By 1976, these figures had been reduced to - 23%, 14% and 43% respectively.
- * The percentage of those age 15 and over indicating a non-official mother tongue rose from 11% in 1971 to 16% in 1976. In 1976, the largest proportion of people with post-secondary education was in the Indo-Pakistani (61%), German (49%) and Hungarian (46%) - 11% of tongue groups. The lowest were the Portuguese (7%), Italian (10%) and Greek (15%) groups.
